

Press Release

RWE has commissioned 83 megawatts of wind and solar capacity in France

- RWE has added four new wind farms and one solar farm to its French renewables fleet
- In total the new plants will be able to generate enough green electricity to supply around 40,000 households

Essen/Clichy, 1 September 2025

Over the summer, RWE commissioned four new wind farms and one solar plant with a total installed capacity of 83 megawatts (MW) in France. Located in the Hauts-de-France, Normandy and Nouvelle-Aquitaine regions, RWE started construction of the plants in 2024 following the successful participation in the French Energy Regulatory Commission's (CRE) 2023 onshore wind and solar tenders.

In the Hauts-de-France region, RWE installed the **Catillon-Fumechon** wind farm (21.6 MW, six turbines) in the municipality of the same name, the **Catésis-Bois Marronnier** wind farm (29.2 MW, eight turbines) in the municipalities of Troivilles and Reumont and added four turbines (19.2 MW in total) to its **Nouvions** wind farm. In Normandy, the company commissioned the **Ormesnil** wind farm (9.6 MW, two turbines). And in Nouvelle-Aquitaine, RWE installed 7,420 solar modules at the **Les Pierrières** photovoltaic plant (4.2 MWp) in Ardillières.

Katja Wünschel, CEO RWE Renewables Europe & Australia: "The commissioning of our five new wind and solar farms within just a few weeks is testament to the capabilities of our French teams in managing multiple projects simultaneously. A big thank you to the RWE team, the local communities and all the companies and partners involved. The projects can supply green electricity to around 40,000 French households. In our journey to support France in building a clean, stable and cost-effective energy supply we are using the French wind and sun. Looking ahead, the next projects are already in the starting blocks."

Next wind projects in the starting blocks

Building on these recent successes, RWE is preparing to construct further wind farms in France. RWE was successful with 82 MW of onshore wind capacity in the 2024 onshore wind tenders. As a leading player in the energy transition, RWE operates a total capacity of 265 MW of wind and solar farms in France.

RWE

RWE is leading the way to a modern energy world. With its investment and growth strategy, RWE is contributing significantly to the success of the energy transition and the decarbonisation of the energy system. Around 20,000 employees work for the company in almost 30 countries worldwide. RWE is one of the leading companies in the field of renewable energy. RWE is investing billions of euros in expanding its generation portfolio, in particular in offshore and onshore wind, solar energy and batteries. It is perfectly complemented by its global energy trading business. Thanks to its integrated portfolio of renewables, battery storage and flexible generation, as well as its broad project pipeline of possible new builds, RWE is well positioned to address the growing global demand for electricity, particularly driven by further electrification and artificial intelligence. RWE is decarbonising its business in line with the 1.5-degree reduction pathway and will phase out coal by 2030. RWE will be net zero by 2040. Fully in line with the company's purpose - Our energy for a sustainable life.

Forward-looking statements

This press release contains forward-looking statements. These statements reflect the current views, expectations and assumptions of management, and are based on information currently available to management. Forward-looking statements do not guarantee the occurrence of future results and developments and are subject to known and unknown risks and uncertainties. Actual future results and developments may deviate materially from the expectations and assumptions expressed in this document due to various factors. These factors primarily include changes in the general economic and competitive environment. Furthermore, developments on financial markets and changes in currency exchange rates as well as changes in national and international laws, in particular in respect of fiscal regulation, and other factors influence the company's future results and developments. Neither the company nor any of its affiliates undertakes to update the statements contained in this press release.
